DETAILED ACTION

1. This communication is in response to Applicant's amendment filed on 12 October 2004.

Status of Claims

2. Claim 1, 26, 32 and 34 are currently amended. Claims 2-25, 27-31, 33 and 35 are left as originally filed. Therefore claims 1-35 are under prosecution in this application.

Summary of this Office Action

3. Claims 1-35 are allowed.

Allowable Subject Matter

4. The following is a statement of reasons for the indication of allowable subject matter.

5. The prior art of record (Holmes et al., U.S. Patent 6,119,108) teaches providing printed information to a user in which a user module for interfacing the user with a first database containing first information, the module being responsive to the user requesting the first

Art Unit: 3624

information from the database for obtaining the first information generating a first printed media which is provided to the user and which displays first information (column 7, line 55 thru column 8, line 8).

The prior art of record fails to teach a method wherein a system for providing printed information to a user including identifier means for applying an identifier to the first printed media such that designation of the identifier by the user results in the module generating a second printed media that displays to the user second information obtained from a second database as discussed in the specification; 8.2.1 Netpage Publisher, described on pages 75-79. For these reasons claims 1, 26, 32 and 34 are deemed to be allowable over the prior art of record, and claims 2-25, 27-31, 33 and 35 are allowable by dependency.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
